

GOLDEN EAGLE TRAINING & SAFETY

ADVANCED CARRYING CONCEALED WEAPONS COURSE

The Advanced Carrying Concealed Weapons Course covers briefly the material in the LSP CCH Course but concentrates more on the Fundamentals of Shooting and the Fundamentals of Survival Shooting. Participants enjoy the shooting of more rounds but also experience valuable training information that will help them if ever involved in a critical incident shooting. The course emphasizes more on the following content;

- 1. Firearms safety on and off range and during and after a critical incident. Do's and Don'ts of handling a firearm.*
- 2. Know the difference between the Fundamentals of Shooting & Fundamentals of Survival Shooting.*
- 3. Learn to reload before, during, and after a critical incident shooting, and using cover while doing so.*
- 4. Learn the difference between Combat Point Shooting and shooting from distance, and the difference between both.*
- 5. Shooting from cover and concealment and know the difference between both.*
- 6. Know when to take cover or concealment.*
- 7. Learn to shoot at center mass of threat.*
- 8. Learn how to shoot from distance using sight alignment / sight picture, and if available support for better accuracy.*
- 9. Recognize when to shoot and not shoot.*
- 10. Learn the benefits of a properly clean and lubricated firearm.*

Participants will experience less classroom and more range exercises. Participants only need to have attended one of the Basic CCH Classes conducted by G.E.T.S or possess a current CCH permit, from any state that issues such. After completion of the 8 hour course, participants experience and better understand the effects of a shooting incident.
