

GOLDEN EAGLE TRAINING & SAFETY

OCTOBER 2012 Newsletter

We hope this month's newsletter finds all who read it doing well and if able, carrying concealed. Two training classes will be conducted by G.E.T.S. in October, a Basic Carrying Concealed Handgun Class on Saturday, October 13th, and an Advanced Carry Concealed Weapon Class on Saturday, Oct. 20th, 2012, in Homer, LA. The class on the 13th, as most of you know, is required for the process of applying for a carrying concealed permit from the LA State Police. The class on the 20th is not a requirement for obtaining a permit from LSP, however goes into depth a little more, no,...let's say a lot more than the basic CCH course. It could though, be used as a requirement for carrying concealed in your church with the Pastor's or governing person(s) approval. The course goes into and covers more of the five fundamentals of shooting, to when does those apply, definition of cover and concealment and shooting from behind both, shooting multiple targets, shoot ,or don't shoot and more. We have yet to find any one that was disappointed after completing that course. Due to the amount of time working with each participant in the advanced course, we do have to limit the size of the class to no more than fifteen.

If you know of anyone interested in attending either class on the 13th or 20th, they can register online at this website or do so by requesting a registration form in the mail by calling 318-927-5026 or 318-268-5052. The only requirement we have on the advanced class is that the participant must have in his/her possession, a current CCH permit from their state or attended one of G.E.T.S. CCH classes.

We cannot stress enough the importance of carrying concealed. Who would have ever thought that someone would get involved in an altercation with a violent person in a McDonalds. It has already happened in our country, many times. Who would have ever thought that teenagers and children would get shot while attending school? It has already happened also many times in our country. Who would have ever thought that someone would get shot while attending church? It

too has already happened. And who would have ever thought that adults, teenagers, children ,and servicemen would get shot while attending a movie at a cinema. As all of you know, it too has already happened in our country.

By carrying concealed legally, you may not only prevent you or a person with you from being injured or mortally wounded, but prevent three, four ,or many more from being wounded or mortally injured. And all of those may be family members. One can never predict the future, but one can be prepared to go to the future. There has never been a time for us that we wished we would have been carrying concealed and never been a time we wished we weren't carrying concealed. Hope that makes sense. Be Prepared! I believe that is a Boy & Girl Scout motto. And with the holiday seasons just around the corner, be prepared to carry concealed wherever you go, even if it is just down to the corner store. With both Butch & I involved in law enforcement, you just don't realize how comforting it is to see you that have attended one of our many CCH classes and be told you were carrying concealed at that time... We would reply, Carry On!

Also just around the corner is election day where we vote on some of the most important positions in our enforcement, legislative and judicial systems and for our President of the United States. It does not matter what political party, creed or race, exercise that constitutional right to vote, the same we are doing by carrying concealed. Doesn't it bother you when someone complains about who is in office and when you asked them if they voted for that person or did they vote and they reply with a no. Burns us to high heaven. Don't be one of those.

When you take time to vote, take that moment in the booth to simply pray for your city, parish, state, and government leaders and especially for our military and our country. May God Bless America again!
